"Once again, I want to thank BOA Handcuff on behalf of the MN DOC for your willingness to listen to me regarding the security concerns and your development of this new product to address them. I have never worked with a company so willing to listen and respond accordingly. "

—Captain Steven Ayers

Minnesota Department of Corrections

"Thank you for your much needed assistance. I will email a formal letter to you in the morning indicating our satisfaction with the locking mechanisms that you have provided for our agency. We are very satisfied and to date no one has been able to tamper, escape or even attempt to compromise the cuffs and locking devices that you have recommended and given us. Again, thank you very much and I look forward to working with you in the future."

—Turhan Gumusdere, Bureau Chief

NYC Department of Corrections

ESCAPE IS NOT AN OPTION

The BOA Handcuff Company, manufacturer of Cuff-Maxx® Upgrades, was formed in 1997 by a group of individuals with a vision of improving safety for law enforcement personnel.

We believe that our products are the most significant advancement in safety since the bullet proof vest. Our Cuff-Maxx® upgrades are installed over existing equipment, and utilize Medeco® and ASSA® Desmo keys and pick resistant cylinders, that provide handcuffs and leg irons with a formidable high security lock.

BOA works diligently to provide exceptional service and post sales support for our products. We strongly believe that any successful company must continue to service its customers and offer superior customer service and support.

Cuff-Maxx® Upgrades provide controlled duplication of keys! Only per-authorized purchasers can obtain duplicate keys. NO EXCEPTIONS... NO KIDDING!

Signatures of pre-authorized purchasers are kept on file and are compared to the purchase request prior to processing orders for duplicate keys. If the signatures do not match, the request is denied and the registered user is notified.

Key banks are not available to the locksmith community. Therefore, duplicate keys cannot be made without following the established procedure.

Agencies, Departments and Correctional Facilities can have their own key code.

Handcuffs and leg irons can be "keyed-Alike" or "Keyed-Differently", depending on the department's requirements.

DOUBLE LOCKED

CUFF-MAXX® UPGRADES ARE AVAILABLE FOR ALL PEERLESS AND SMITH & WESSON RESTRAINTS, EXCEPT HINGED MODELS.

BOA's CM HIGH SECURITY TRANSPORT BOX for chain style handcuffs has been designed to accommodate both our Peerless and Smith & Wesson models that utilize our High Security Cuff-Maxx Key System. It is made using High Impact Resistant Aluminum and Powder Coated Orange for High Visibility.

It keeps handcuff keyholes covered for High Risk Inmate Transports. Handcuffs can be preloaded into box before being put on prisoner.
